## WORK EXPERIENCE

### Senior Frontend React js developer
Microland Pvt. Ltd

*08/2022 - Present*
*Achievements/Tasks*

- Lead the development of the Intelligeni Observe Platform, integrating AI features through build bundling technology, resulting in a notable 25% reduction in Page Load and Response Time.
- Optimized a critical module, achieving a 15% enhancement in user experience. Contributed to the creation of cross-browser web components, ensuring compatibility across various UI-based technologies and platforms.
- Implemented user-guided website tours to assist naive users, enhancing accessibility and user experience in navigating digital platforms.
- **Professional Summary:** Demonstrated leadership and technical expertise in developing a high-performance platform, significantly enhancing user experience and accessibility through strategic optimizations and guided features.

### Frontend Developer
DIATOZ Solutions Private Limited

*03/2021 - 07/2022*
*Achievements/Tasks*

- Implemented micro Frontend architecture, leading to a vast improvement in page load and response time, enhancing overall system efficiency.
- Engineered a Low Code Platform, reducing development time by 25% and increasing platform scalability by 30% through the implementation of Micro Frontend technology.
- Worked with diverse technologies including React.js, React Native, Strapi, and WordPress, showcasing proficiency in a range of development tools and frameworks.
- **Professional Summary:** Effectively managed and enhanced a complex project by implementing real-time features and developing multiple modules independently, showcasing strong technical and project management skills.

## EDUCATION

### Bachelor of Engineering
Visweswariah technological university, Banglore

*06/2016 - 10/2020*

### PUC
Maharaja PU College, Mysore

*06/2014 - 04/2016*
